

FreedomSoft for \$397 by Preston Eli

Did you miss the webinar we did last night where we explained how to get FreedomSoft for \$397?

Well we posted it online so you can watch it now.

[Click Here To Watch It Now](#)

Also, just a heads up, your opportunity to get your hands on the Miracle Money Machine for super low payments of \$397 ends tonight at midnight (or until the remaining slots are filled - whichever comes first).

And then?

Poof

FreedomSoft will be gone.

You will look high and low. You will search the ends of the internet and the earth itself.

But you won't find it.

You will have missed your opportunity to join our freedomSoft family ... the most technologically advanced group of real estate investors on the planet.

The coolest ...

The sexiest ...

The laziest ...

And the most elite New Rich mofo's of the universe.

The doors will be locked. And you'll be stuck doing things the old fashioned way ...

- keeping track of your deals with ... what do you call those things? ... oh yeah ... "file folders"
- tracking your business metrics with those old school "calculators" and your own brain
- filling out contracts with those weird stick looking thingys. "Pens" I think they're called.

[Click Here To Please Never Do These Lame Things Again](#)

- Finding cash buyers by doing what the farmers of old had to do ... "work."
- Calling sellers with those expensive hand held telecommunication phone widgets (instead of direct through your computer for \$2 a month)
- Actually paying cash money for leads (ew)
- Finding rental rates by wasting time talking to humans (and getting the wrong answers)
- trying to figure out home values (and failing miserably)
- Tracking your direct mail with ... well, nothing because it's too hard and you won't do it.
- Following up with sellers via telephone. Why don't you just go ahead and use a rotary phone while you're at it! LOL! omg stop it you're killing me.

I could go on.

And I will ...

- Paying some shmuck \$1,000 just for the ability to send loan mod leads his way and having none of them close! (free with F\$)
- Manually posting your houses all over the internet by typing things over and over with your actual fingers (when you probably suck at typing!)

- Getting absolutely no leads from your website because ... well ... because it sucks!

If you think I'm over-exaggerating about all this, I double dare you to test drive Freedom\$oft for 60 days risk-free. You will find that I'm understating my case.

Freedom\$oft is the future. Period. Everyone and their mother is about to start trying to knock it off (think "Google Phone" to Iphone), but they will never catch us. We have too many things in development already. Our next version will be bigger, badder, and more expensive. Good thing those who get in now will get all these upgrades for free.

Watch this webinar now. And join the revolution.

Preston

p.s. the webinar and all chances to get Freedom\$oft end at midnight tonight, or until sold out. Whichever comes first [Click Here To Watch The Replay Now](#)
